But if you would know what a Lease for 14 years is being, is worth to be made up 21 years, after the rate of 6 in the hundred: do but subtract 9 years purchase and 1 quarter (the value of 14 years) from 11 years and 3 quarters (the value of 21 years after that rate) and the remainder, being 2 years purchase and an half, is the true value.

If you would know the quantity that any Veſſel containeth either in Wine or Ale Gallons; you muſt 1. Take the Diameter at the Head, and alſo at the Bung in the inſide of the Veſſel; both of them in inches. 2. Find the number of inches at the Bung, and the number that ſtandeth againſt them ſet down twice. 4. Add theſe three numbers together. 5. Multiply the Sum of theſe three numbers, by the number of inches that the Veſſel is long, and from the product cut off three Figures towards the right hand: ſo ſhall the Figures towards the left hand be whole Gallons, and the three Figures on the right hand are thouſand parts of a Gallon.
